Giclee prints have exceptional archival and aesthetic qualities, in addition to the economic benefits to the artist/photographer, with print runs starting at a single print. Using acid-free fine art and photographic papers, pigment inks sets and special UV coatings these prints have a display life that can exceed 100 years in ideal conditions. Traditional photographic prints have a lifespan of 20 years.

Reproductions can be produced using your own photographs, artwork, digital files from cd, memory card and email. The higher the digital resolution image is, the better quality reproduction will be produced.

For a photo-realistic feel to your prints, choose from our selection of photo gloss and photo matt papers. Give your work a different personality when printed on fine art water colour or canvas media.

Digital File Creation

The giclee digital workflow involves the creation of a high-end digital file. We strongly recommend having your work scanned by us directly to a file, as this facilitates the proofing process and achieves superior results.

Image scan up to A4 size from **£10.00**

Image scan over A4 size from **£30.00**

Editing Studio

Bring out the best in your digital images. Fix common flaws, enhance picture quality and make a one of a kind photo project.

Change backgrounds of images, removal of unwanted people or items, changing from colour to black & white or sepia, adding text to images for that special occasion poster for home or adding logos to a Point of Sale for the workplace. Photo restoration, bringing old photos back to life again and much more.

Studio adaptations/proofing from **£20.00 per hour**

Photograph restoration from **£30.00**
